

Reliability Program of the Year

- Best-in-class reliability performance
- Integrating proactive maintenance practices
- Effective communication and KPI development
- Maximum usage of predictive technologies

Emerson Process Management and the University of Tennessee Reliability & Maintainability Center recognize leaders who best demonstrated effective use of reliability-based technologies:

Reliability Programs— Technologies that Work (TF-2595)

Session 1: Tuesday, October 7th
1:00 pm–2:30 pm (2 presentations)

Session 2: Wednesday, October 8th
1:15 pm–2:45 pm (2 presentations)

Winner announced at the conclusion of the Wednesday presentations

Congratulations to the companies competing for this year's title of Reliability Program of the Year:

- Celanese—Narrows, VA Plant
- Consolidated Edison—59th St. New York, NY Plant
- LyondellBassell—Channelview, TX Plant
- Praxair—The Woodlands, TX Plant

And don't forget... you are invited to compete in our annual competition in 2015.
